DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claim 20 is rejected under 35 U.S.C. 102(e) as being anticipated by von Harrach et al. (US 2005/0054115).

Regarding claim 20, von Harrach et al. teaches employing a Focused Ion Beam in a non-reactive gas environment (see paragraph 20); effecting a phase shift in the signature to a gaseous state (see paragraph 20); and providing a continuous pump-out of the non-reactive gas environment to remove a signature in gaseous form (see paragraph 20).

Allowable Subject Matter

2. Claims 1-19 and 21-24 are allowed.

The following is an examiner's statement of reasons for allowance: Please see previous office action and applicant's response for reasons for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
